Worst Week Since August 2

The S&P 500 Index posted its largest weekly decline since August 2 when it then lost 3.1%. Moreover, with market volatility resurfacing last week due to the spreading coronavirus, the S&P 500 registered its first monthly loss since August. Through the weekend, the Wuhan, China-originated virus has claimed the lives of 362 people with 17,846 active cases being treated worldwide. That's more than quadruple the number of fatalities in a week's time and more than a six-fold increase in the number of active cases. Late Thursday, the World Health Organization declared a public health emergency and airlines around the world suspended flights to and from China.

Weekly Performance

For the week, the Dow Industrials sank 2.53%, the S&P 500 fell 2.10%, and the Nasdaq Composite retreated 1.75%. The Dow Industrials and the S&P 500 both erased gains for the year with January losses of 0.99% and 0.04% respectively, while the Nasdaq Composite finished the month with a 2.03% gain. The Cboe VIX Market Volatility index surged over 29% last week.

Hints for a 2020 Rate Cut?

The Federal Reserve left interest rates unchanged at 1.50%-1.75% and Fed Chairman Powell reaffirmed his steady-as-she-goes policy outlook. His comments, however, suggested that lingering risks to the global economy and persistently low inflation means that if policymakers were to change rates, they would be more likely to cut them than to raise them. With added coronavirus-induced growth concerns, a 2020 cut is now likely.

Energy Stocks Suffered Most

Nine of the 11 major sector groups posted losses last week, with Energy (-5.59%), Materials (-3.54%), and Healthcare (-3.24%) down the most. Just two sectors posted gains: Utilities (+0.85%) and Consumer Discretionary (+0.15%).

Treasury Yields Flat

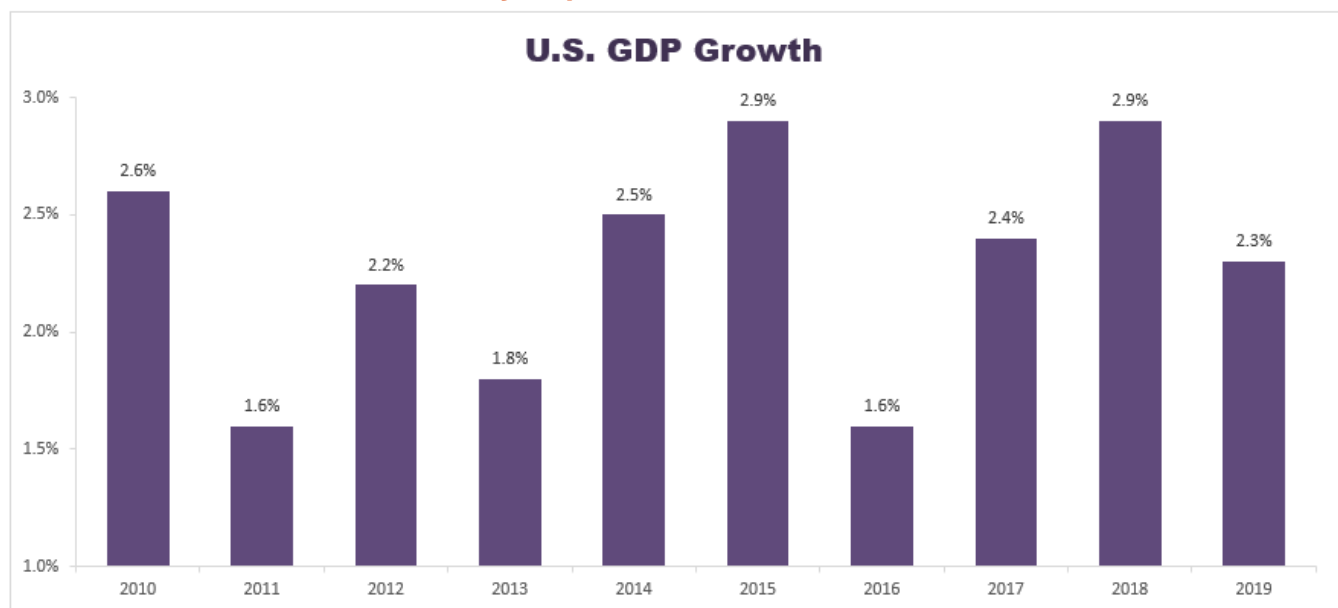

U.S. Treasury prices rallied amid the equity risk-off selling, sending the yield on benchmark 10-year notes down an additional 17.7 basis points last week to 1.508%. For the week, the U.S. Dollar Index weakened by 0.47%, while WTI crude oil fell 4.85%, extending a January slide into a fourth week to end at \$51.56/barrel.

Market Watch

Stocks	1-Week	MTD	3-Month	YTD	1-Year	3-Year

Chart of the Week: U.S. Economy Expanded 2.3% in 2019

Source: Cetera Investment Management, Federal Reserve Bank of St. Louis, U.S. Bureau of Economic Analysis. Data as of 12/31/2019.

U.S. GDP growth expanded at an annualized rate of 2.1% in the fourth quarter, matching the growth rate in the third quarter. While business investment declined for the third-straight quarter, consumer spending and residential investment growth was positive. For the year, GDP growth slowed to 2.3% from 2.9% in 2018. Despite the slowdown, economic growth last year equaled the average annual growth level for the decade.

Glossary

The **Dow Jones Industrial Average** is a price-weighted average of 30 significant stocks traded on the New York Stock Exchange and the NASDAQ.

The **S&P 500** is an index of 500 stocks chosen for market size, liquidity and industry grouping (among other factors) designed to be a leading indicator of U.S. equities and is meant to reflect the risk/return characteristics of the large cap universe.

The **NASDAQ Composite Index** includes all domestic and international based common type stocks listed on The NASDAQ Stock Market. The NASDAQ Composite Index is a broad-based index.

The **Russell 2000 Index** measures the performance of the small-cap segment of the U.S. equity universe and is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership.

The **Russell 3000 Index** measures the performance of the largest 3,000 U.S. companies representing approximately 98% of the investable U.S. equity market.

The **Russell Midcap Index** measures the performance of the mid-cap segment of the U.S. equity universe. It includes approximately 800 of the smallest companies in the Russell 1000 Index, based on a combination of their market cap and current index membership. The Russell Midcap represents approximately 31% of the total market capitalization of the Russell 1000 Index.

The **Bloomberg Barclays US Aggregate Bond Index**, which was originally called the Lehman Aggregate Bond Index, is a broad based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate debt securities, MBS (agency fixed-rate and hybrid ARM pass-throughs), ABS and CMBS (agency and non-agency) debt securities that are rated at least Baa3 by Moody's and BBB- by S&P. Taxable municipals, including Build America bonds and a small amount of foreign bonds traded in U.S. markets are also included. Eligible bonds must have at least one year until final maturity, but in practice the index holdings have a fluctuating average life of around 8.25 years. This total return index, created in 1986 with history backfilled to January 1, 1976, is unhedged and rebalances monthly.

The **Bloomberg Barclays US Corporate High Yield Index** measures the USD-denominated, non-investment grade, fixed-rate, taxable corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch, and S&P is Ba1/BB+/BB+ or below, excluding emerging market debt. Payment-in-kind and bonds with predetermined step-up coupon provisions are also included. Eligible securities must have at least one year until final maturity, but in practice the index holdings have a fluctuating average life of around 6.3 years. This total return unhedged index was created in 1986, with history backfilled to July 1, 1983 and rebalances monthly.

The **Bloomberg Barclays US Municipal Bond Index** covers the USD-denominated long-term tax-exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds, and prerefunded bonds. Many of the subindices of the Municipal Index have historical data to January 1980. In addition, several subindices based on maturity and revenue source have been created, some with inception dates after January 1980, but no later than July 1, 1993. Eligible securities must be rated investment grade (Baa3/BBB- or higher) by Moody's and S&P and have at least one year until final maturity, but in practice has a fluctuating average life of around 12.8 years. This total return index is unhedged and rebalances monthly.

The **MSCI All-Country World Index** is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The MSCI ACWI consists of 46 country indexes comprising 23 developed and 23 emerging market country indexes. The developed country indexes include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the United Kingdom and the United States. The emerging market country indexes included are: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Peru, Philippines, Poland, Qatar, Russia, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates.

The **MSCI EAFE Index** is designed to measure the equity market performance of developed markets (Europe, Australasia, Far East) excluding the U.S. and Canada. The Index is market-capitalization weighted.

The **MSCI Emerging Markets Index** is designed to measure equity market performance in global emerging markets. It is a float-adjusted market capitalization index.

The **MSCI Europe Index** is a free float-adjusted market capitalization index that is designed to measure developed market equity performance in Europe.

The **MSCI Pacific Index** captures large and mid-cap representation across five Developed Markets (DM) countries in the Pacific region. With 470 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country.

The **Bloomberg Commodity Index** is a broadly diversified index that measures 22 exchange-traded futures on physical commodities in five groups (energy, agriculture, industrial metals, precious metals, and livestock), which are weighted to account for economic significance and market liquidity. No single commodity can comprise less than 2% or more than 15% of the index; and no group can represent more than 33% of the index. However, between rebalancings, group weightings may fluctuate to levels outside the limits. The index rebalances annually, weighted 2/3 by trading volume and 1/3 by world production.

The **S&P GSCI Crude Oil Index** is a sub-index of the S&P GSCI, provides investors with a reliable and publicly available benchmark for investment performance in the crude oil market.

The **S&P GSCI Gold Index**, a sub-index of the S&P GSCI, provides investors with a reliable and publicly available benchmark tracking the COMEX gold futures market.

West Texas Intermediate (WTI) is crude oil produced in Texas and southern Oklahoma which serves as a reference or "marker" for pricing several other crude streams. WTI is the underlying commodity of the New York Mercantile Exchange's oil futures contracts.

The **Cboe Volatility Index® (VIX®)** is a key measure of market expectations of near-term volatility conveyed by S&P 500 stock index option prices.

The **U.S. Dollar Index** is a weighted geometric mean that provides a value measure of the United States dollar relative to a basket of major foreign currencies. The index, often carrying a USDX or DXY moniker, started in March 1973, beginning with a value of the U.S. Dollar Index at 100.000. It has since reached a February 1985 high of 164.720 and has been as low as 70.698 in March 2008.
